

Proposal

Date: 4/1/26

Location: 855 Alder Ave, Incline Village, NV 89451

Project: Washoe County Sheriff's Office - IVJC

Safe Haven Defense US, LLC. is pleased to provide you with this proposal.

Scope: Furnish and install Bullet Resistant Security Film (**PISTOL RATED**) and exterior anti-graffiti film (if feasible) on select windows and doors. Safe Haven Defense will caulk any window that film is installed on per manufacturer's specifications. **Interior windows will be caulked on both interior and exterior if graffiti film is applied. Exterior vinyl coverings and stickers will not receive anchoring caulk for easy removal.** **NOTE:** It will be WCSO's responsibility to move any objects obstructing the installation area, to include desks or cabinets. It is also WCSO's responsibility to remove or coordinate the removal of any door crash bars (electronic or manual) and/or door handles. WCSO is also responsible for removing any window blinds, shelves and displays if applicable. Safe Haven Defense Installers will need approximately 2.5 – 3ft of space minimum between objects and the installation area, but larger windows may require more space.

Existing Glass Notes: Safe Haven Defense installation crews will remove any vinyl lettering prior to the installation of our security laminate. We do not replace vinyl lettering or coverings, but we will take photos of what was there prior. Existing tint or security film will be removed for an additional charge. Current condition of the existing glass of this facility was confirmed to be in good condition. Small chips in the glass are not a concern, but while installing the laminate, these panes of glass may crack because of the chips. In this case WCSO will be responsible for the replacement. We will communicate our areas of concern to WCSO personnel prior to first touch of glass so there isn't any confusion on cause of damage. SW600BR provides NIJ Level I bullet resistance on all Single Pane 1/4" protected glass and NIJ Level II bullet resistance on all Dual Pane 1/4" protected glass. There may be some space concerns, Safe Haven Defense installers will install film in the existing open space as far as they can reach, or space allows.

Pricing:

Bullet Resistant Security Laminate (Pistol Rated - Highlighted in BLUE) - \$216.00 Per SqFt

Explosion Resistant Anchoring Caulk (DOW 995): \$5.20 Lf

Main Entry:

Total Bullet Resistant SqFt: 109
Total Caulk LF: 277
Total Frost SqFt: 31
Total BR Glass Pieces: 11
Total Frost Windows: 3

APPROVED

By Ben West at 4:44 pm, Apr 08, 2026

101111 / 711502

Subtotal: \$24,984.40

Sales Tax: Exempt

Project Total W/ Sales Tax: \$24,984.40

Travel Fee:

We have our films strategically priced to have all various fees included and keep our prices as low as possible. Travel is more expensive than ever, and we do everything we can to not have an additional charge for travel. In the event we arrive on site at the scheduled date, and the site is not clean and ready for laminate to be installed, a \$7,500 travel fee will be assessed for the delay.

Scheduling:

It is Safe Haven Defense’s goal to install our security laminate quickly and efficiently to minimize any distraction we may cause to our clients. If a building is new construction, all windows must be installed prior to our installation team’s arrival. If windows are not installed, a \$5,000 rescheduling fee will be assessed. This is to cover return travel and set up to complete the security laminate installation. Leadtime for installation is currently 3 – 6 weeks. **NEW CONSTRUCTION:** Once a contract is established, Safe Haven Defense will schedule installers for 7 days prior to the expiration of the contract. In the event that there is a schedule change. It is the General Contractors responsibility to notify Safe Haven Defense in writing 2 weeks before the originally scheduled installation date.

Exclusions: This proposal does not include any adjustments to the windows or frames not discussed in “Scope”. Any work not listed in “Scope” and not included in take-off provided. Unforeseen issues with glass or frames. Overtime, Holiday work, Night work and Weekends work. Miscellaneous permits. A QuickBooks estimate will be provided with appropriate sales tax applied.

Thank you for this opportunity, please do not hesitate to contact me directly with any questions or comments.

Respectfully submitted,

Ted Czajkowski – 630-915-6598

Disclaimer

Since films are applied with a water-based solution, it is normal for minor bubbling and hazing to occur during installation before curing. This curing period will vary in time depending on the level of exposure to direct sunlight and time. All moisture and water bubbles will disappear with time. SAFE HAVEN DEFENSE will take every necessary action possible to clean all windows prior to the installation of the window film; minor dust particles may appear after the installation of the window film as a result of airborne dust. These particles will dissipate with time and should not be visible when looking through the glass at a distance of 6 feet. (Ask for further details). Security Films/Laminates are a deterrent and may not prevent ultimate entry.
